Fastener Training Institute: A New Platform for Lafa

The Los Angeles Fastener Association has a long legacy of supporting industry education and training for members of the Southern California fastener community, ever since the association was formed forty years ago.

The Lafa Board of Directors recently created the Fastener Training Institute™ as the platform for delivering not only the programs we offer to members locally but for bringing quality education and training to other parts of the country as well.

Effective immediately, Lafa's training programs will be produced by the Fastener Training Institute. The first program to come under this new umbrella was Fastener Quality Assurance, offered August 12, 2008 at the Holiday Inn Select in La Mirada, California.

All of Lafa's Certified Fastener Specialist™ and Product Training Program classes will be produced by the Fastener Training Institute™. And, the Lafa Board is committed to investing in the development of additional training programs to meet the needs of the fastener community, its many specialty segments and its end-users. And not only here in Southern California, but across North America and in other parts of the globe as well.

The Fastener Training Institute is an outgrowth of Lafa's strategic vision and supported by our core purpose, which is to enhance fastener use, reliability and safety.
