

# Got Fastener Training?

## Got "Web-Based" Fastener Training?

### Webinar – Wikipedia

Web conferencing refers to a service that allows conferencing events to be shared with remote locations. These are sometimes referred to as webinars or for interactive conferences, on-line workshops. In general, the service is made possible by Internet technologies, particularly on TCP/IP connections. The service allows real-time, point-to-point communications as well as multi-cast communications from one sender to many receivers. It offers data streams of text-based messages, voice and video chat to be shared simultaneously, across geographically dispersed locations. Applications for web conferencing include meetings, training events, lectures or short presentations from any computer.

### Fastener – Wikipedia

A fastener is a hardware device that mechanically joins or affixes two or more objects together.

### Training – Wikipedia

Training is the acquisition of knowledge, skills and competencies as a result of the teaching of vocational or practical skills and knowledge that relate to specific useful competencies. Training has specific goals of improving one's capability, capacity, productivity and performance.

The **Fastener Training Institute® (FTI)** brings these together for high-content, low-cost readily available fastener product training. Over the years, FTI has brought fastener industry experts to a variety of venues nationwide to conduct high-quality fastener product training events. We will continue this in 2015 with over 30 classes in ten cities. We now extend our reach to anywhere there is a high-speed internet connection with our Interactive Webinar Series.

### FTI Interactive Webinar Fastener Product Training

We introduced this new format in August 2014 with **Joe Greenslade's** "Thread Fit Matters." This event was co-produced with the **Industrial Fasteners Institute (IFI)** where

FASTENER  
TRAINING  
INSTITUTE

Joe is Director of Engineering Technology, and was a huge success and very well attended and received. Based on the response, we asked **Carmen Vertullo** to produce and present a new series of webinars for us. Carmen, of **Carver Consulting**, is a primary trainer at FTI and is very well known in the fastener industry for his teaching, magazine articles and consulting services. The series began with Carmen's presentation on "Fastener Coatings and Platings".

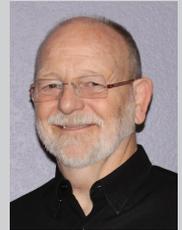

Our plans are for monthly webinars covering a wide variety of topics about fastener products and their uses. Our format is a 60-minute presentation followed by a 30-minute question and answer period. Questions are submitted via the web link during the presentation.

How does it work? Just visit [www.FastenerTraining.org](http://www.FastenerTraining.org) and click on the Webinar tab to see the upcoming schedule of presentations and then register. You will be sent an email containing your sign-in details. We offer both single and multi-attendee registration options.

**Jo Morris** is our Web Training Coordinator and can be reached at [JoM@FastenerTraining.org](mailto:JoM@FastenerTraining.org) for help or details. Don't forget to check our website for the schedule of our upcoming traditional in-person training classes. There is still time to register for the remaining classes in 2014. Make an investment in your future or in that of your employees.

*Training builds confidence.....confidence brings success.*
